-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1.Claim 35 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 35 is rejected for reasons of record as set forth in the previous action.

2.The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18-21 and 24-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Racich et al in view of Sanefuji et al for reasons of record noting the following.

Applicant has cancelled claims 22 and 23 and basically put the recitation(s) into independent claim 18. However, Sanefuji et al teaches this stretching ratio, and in a boric acid bath. See paragraph 30 in the secondary reference. It is maintained that the larger width taught in the secondary reference would have required a larger stretching distance in the primary reference and hence the claims would have been obvious over the combination as applied.

3.Applicant's arguments filed September 25, 2006 have been fully considered but they are not persuasive. Applicant's comments have been noted but are not persuasive. Sanefuji et al teaches the instant stretching ratio in a boric acid bath. Even though the applied art does not explicitly teach the instant stretching distance (ie, variable A), it is submitted that such would have been an obvious modification to the process of the

primary reference when taking into account the larger width of the polarizer as taught in the secondary reference. As already noted, the residence time in the bath is calculated to be 3.4 minutes, which meets the instant ratio of A/B.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mathieu D. Vargot whose telephone number is 571 272-1211. The examiner can normally be reached on Mon-Fri from 9 to 6.
